OVERVIEW

This degree is designed to provide the students with knowledge and learning in the various areas of Information Technology. It is aimed to provide students with critical competences and cutting-edge skills of core information technologies of human computer interaction, information management, programming, networking, and web systems and technologies.

It is also targeted to enable students to critically analyse, identify, and solve real-world problems; to design, implement, and evaluate a computer-based system, process, component, or programme to meet desired needs.

Moreover the students acquire skills to manage information effectively and integrate IT-based solutions into the user environment. It is also targeted that the students acquire an ability of a keen appreciation to demonstrate, professionalism and ethical behaviour, including responsible teamwork, creativity and communication skills with professional attitudes, and be prepared for the complexity of the actual work environment and life-long learning.

PROGRAMME AIMS

The aim of the Information Technology programme is to:

- Exhibit the relevant skills and knowledge for pursuing the Information Technology (IT) career in industry including corporate as well as government sector.
- Pursue life-long learning leading to entrepreneurship, research and development.
- Contribute to the society through their ethical and professional norms by demonstrating them in IT professions.
